PROFILE

Strategic leader in artificial intelligence (AI), machine learning, and data science, eager to advance the field of large language models (LLMs) and Generative AI. Currently spearheading LLM feature design and risk assessment initiatives at a top S&P 500 healthcare tech company. Proven track record in building high-performing teams and excelling as a people leader and technical contributor in highly ambiguous, complex, and fast-paced environments.

EDUCATION

Ph.D. Physics UNIVERSITY OF CALIFORNIA SAN DIEGO *June 2018*
B.A. Physics and Mathematics UNIVERSITY OF CALIFORNIA BERKELEY *Dec. 2011*

PROFESSIONAL EXPERIENCE

DEXCOM

Sr. Manager, Data Products & AI *Sept. 2023 - Present*

- ◇ Leading a new function responsible for research and development of customer-facing AI/ML products
- ◇ Developing concept products using LLMs to help users understand medical data and meet their health goals
- ◇ Implementing LLM evaluation strategy for regulated products, including tests for accuracy, safety, and empathy
- ◇ Spearheading development of LLMs and other Generative AI feature sets to help users interpret medical data
- ◇ Guiding Generative AI research leveraging differentially-private generative adversarial networks (DP-GANs)

Sr. Manager, Data Science *Sept. 2022 - Sept. 2023*

Manager, Data Science *Nov. 2020 - Sept. 2022*

- ◇ Managed the Experience Individualization Team, including scoping, prioritization, and resourcing of new projects
- ◇ Directed creation of A/B experimentation capability based on product data, driving increased user engagement
- ◇ Authored and oversaw new data science hiring process, doubling and diversifying the global data science team
- ◇ Launched personalized digital marketing program, increasing feature adoption while reducing cost-to-serve
- ◇ Created an organization-wide analytics request process, delivering >100 analyses and accelerating market access
- ◇ Presented data science portfolio and long-term roadmap to Board of Directors, informing organizational strategy
- ◇ Executed data use agreements with multiple universities, expanding IP portfolio through research partnerships

Staff Data Scientist *March 2020 - Nov. 2020*

Sr. Data Scientist *May 2018 - March 2020*

- ◇ Oversaw launch of new customer onboarding experience, addressing critical CX gaps in 1M new user journeys
- ◇ Deployed process enabling validation of quantitative insights with qualitative methods through surveys and UXR
- ◇ Organized user data and marketing system integration, leading technical contributors in R&D, IT, and Marketing
- ◇ Created framework in SQL for measuring product engagement, utilized by data practitioners in multiple teams
- ◇ Published real-world data insights in over 10 manuscripts and conference proceedings, used in marketing claims

UNIVERSITY OF CALIFORNIA SAN DIEGO

Doctoral Student Researcher *Sept. 2013 - May 2018*

- ◇ Supported data operations (including processing and storage) for six analysis teams, used in multiple publications
- ◇ Built shared frameworks in C++ and Python for processing petabytes of data with HTCondor and Hadoop
- ◇ Employed Monte-Carlo methods for background event simulation and likelihood analysis for signal detection

TECHNICAL SKILLS

Artificial Intelligence (AI), Machine Learning (ML), Generative AI, Large Language Models (LLM), Prompt Engineering, Data Modeling, Time Series Analysis, Deep Learning, Statistics, Experimentation, A/B Testing, Metric Definition, Feature Engineering, Monte Carlo Simulation, High-Throughput Computing, Data Architecture, Research Design, Survey Instrumentation, Public Speaking, Sprint Planning, C++, Python, SQL, Cloud Platforms (e.g. GCP)
